

Cloud Computing - Introduction to Cloud Computing

Duration: 10 minutes.

* Indicates required question

1. Full name *

2. Student ID *

3. Today's cloud computing systems are similar to previous generations of distributed systems in that they involve ____.

* 1 point

Mark only one oval.

- ☐ servers coordinating with each other
- ☐ paradigms for computation like Hadoop
- ☐ on-demand access to cloud resources, with pay-as-you-go pricing

4. What is a public cloud? *

1 point

Mark only one oval.

- ☐ A cloud service that can only be accessed from a publicly shared computer.
- ☐ A multi-tenant cloud environment accessed over the internet.
- ☐ A cloud environment owned, operated and controlled by a public company.

5. Which of the following statements could be used to describe a private cloud deployment? * 1 point

Mark only one oval.

- ☐ A cloud environment maintained within an enterprise's own data center.
- ☐ A private environment within a third party or public cloud provider's cloud architecture.
- ☐ All of the above.

6. Which of the following is a private cloud? * 1 point

Mark only one oval.

- ☐ Amazon Web Services Elastic Compute Cloud.
- ☐ Yahoo's internal Grid clusters, accessible to only Yahoo employees.
- ☐ Microsoft Azure.
- ☐ All of the above.

7. What is a hybrid cloud? * 1 point

Mark only one oval.

- ☐ A blend of public and private cloud services with orchestration between them.
- ☐ A blend of private cloud and legacy on-premises hardware.
- ☐ None of the above.

8. Is a multi-cloud the same as hybrid cloud. * 1 point

Mark only one oval.

- ☐ Yes
- ☐ No

9. In public cloud, which of the following components are cloud customers, not providers, responsible for? * 1 point

Mark only one oval.

- ☐ The physical security of cloud data centers.
- ☐ The security and maintenance of underlying hardware, such as servers.
- ☐ The security of users' data.
- ☐ None of the above.

10. Which of the following is NOT a PaaS offering? * 1 point

Mark only one oval.

- ☐ Microsoft Office 365.
- ☐ Azure App Service.
- ☐ AWS Elastic Beanstalk.
- ☐ Google App Engine.

11. What does it mean when a public cloud provider has an availability of five nines? * 1 point

Mark only one oval.

- ☐ No downtime.
- ☐ Unavailable for potentially five minutes a month.
- ☐ Unavailable for potentially five minutes a year.

12. Which of the following terms refers to a deployment model in which an application runs in an enterprise's private cloud or data center but uses public cloud resources to support spikes in user demand?

* 1 point

Mark only one oval.

☐ Cloud bursting.

☐ Cloud bubble.
