

Cloud Computing - VMware

Duration: 10 minutes.

* Indicates required question

1. Full name *

2. Student ID *

3. What is the benefit of virtualization enabled by an organization?

1 point

Mark only one oval.

- ☐ Removal of unique hardware and utility requirements.
- ☐ Effective management of resources.
- ☐ None of the above.
- ☐ All of the above.

4. What is the function of a hypervisor in a cloud solution? *

1 point

Mark only one oval.

- ☐ It emulates system calls.
- ☐ It provides the means to share a CPU with multiple operating systems.
- ☐ It optimizes CPU and I/O performance.
- ☐ It provides full virtualization.

5. Which of the following is a type 2 hypervisor? *

1 point

Mark only one oval.

- ☐ Microsoft Windows Server with Hyper-V.
- ☐ VMware ESXi.
- ☐ VMware Workstation Pro and VMware Fusion.
- ☐ Red Hat Linux with the KVM feature.

6. The guest operating system must be modified to actualize an API capable of exchange of hyper calls with hypervisor. What is the hypervisor?

1 point

Mark only one oval.

- ☐ Software assisted virtualization.
- ☐ Para-virtualization.
- ☐ Full virtualization
- ☐ None of the above.

7. Which virtualization enables the detachment of the user state, the operating system (OS), and the applications from the end-point devices.

1 point

Mark only one oval.

- ☐ Hardware virtualization.
- ☐ Software virtualization.
- ☐ Desktop virtualization.
- ☐ Network virtualization.

8. Which virtualization enables an end user to use software without any installation, integration, or dependencies on the underlying computing platform?

1 point

Mark only one oval.

- ☐ Hardware virtualization.
- ☐ Desktop virtualization.
- ☐ Application virtualization.
- ☐ Storage virtualization.

9. What is storage on demand from a shared storage pool?

1 point

Mark only one oval.

- ☐ Thin provision.
- ☐ Thin pool.
- ☐ Thick provision.
- ☐ Thick pool.

10. What enables storing the VM files on a remote file server.

1 point

Mark only one oval.

- ☐ VMFS.
- ☐ NFS.
- ☐ Block level FS.
- ☐ File level FS.

11. What allows traffic from multiple VLANs to traverse a single network connection?

1 point

Mark only one oval.

- ☐ vLAN tagging.
- ☐ vLAN trunking.
- ☐ Network traffic.
- ☐ NIC teaming.

12. What is the function of a virtual data center?

1 point

Mark only one oval.

- ☐ It optimizes the CPU and I/O performance.
- ☐ It provides the means to share a CPU with multiple operating systems.
- ☐ It allows centralized management.
- ☐ It provides full virtualization.
