

Cloud Computing - Storage in the Cloud

Duration: 10 minutes.

* Indicates required question

1. Full name *

2. Student ID *

3. RAID 10 combines mirroring and striping to provide both redundancy and improved performance. * 1 point

Mark only one oval.

☐ True

☐ False

4. You have 8 drives, each 2 TB, and want to use RAID 6. What is the usable storage capacity? * 1 point

Mark only one oval.

☐ 8 TB

☐ 12 TB

☐ 14 TB

☐ 16 TB

5. ___ allow users to store data inside folders (or directories) to organize files hierarchically. * 1 point

Mark only one oval.

- ☐ File storage services
- ☐ Block storage services
- ☐ Object storage services

6. ___ generally provide a simple HTTP API for access, and data is immutable by default. * 1 point

Mark only one oval.

- ☐ File storage services
- ☐ Block storage services
- ☐ Object storage services

7. A ___ is not a complete file and can be accessed over any operating system. * 1 point

Mark only one oval.

- ☐ data block
- ☐ disk
- ☐ cloud storage

8. Direct-attached storage (DAS) can easily be accessed by other devices. * 1 point

Mark only one oval.

- ☐ True
- ☐ False

9. Network-attached storage (NAS) is a block-level storage architecture that makes stored data more accessible to networked devices. * 1 point

Mark only one oval.

☐ True

☐ False

10. A storage area network (SAN) provides block storage. 1 point

Mark only one oval.

☐ True

☐ False

11. TrueNAS leverages _____. 1 point

Mark only one oval.

☐ ZFS file system.

☐ NTFS file system.

☐ Ext4 file system.

12. Which technical feature of ZFS ensures end-to-end data integrity? * 1 point

Mark only one oval.

☐ Copy-on-write and checksums for all data and metadata.

☐ Journaling of file system writes.

☐ RAID 0 striping.
