

Computer Networks - The Physical Layer

Duration: 10 minutes.

* Indicates required question

1. Email *

2. Full name *

3. Student ID *

4. Which of these allows connections from many devices and inspects the contents of ethernet protocol data? * 1 point

Mark only one oval.

- ☐ A hub
- ☐ A cable
- ☐ A switch
- ☐ A collision domain

5. What's a router? * 1 point

Mark only one oval.

- ☐ A physical layer device that allows connections for many computers at once.
- ☐ A physical layer device that prevents crosstalk.
- ☐ A device that knows how to forward data between independent networks.
- ☐ A more advanced version of a switch.

6. Which of these is a server? *

1 point

Mark only one oval.

- ☐ A device operating on the data link layer that connects many devices together inspects ethernet protocol data.
- ☐ A device that forwards data between multiple networks.
- ☐ Something receiving data from something providing data.
- ☐ Something providing data to something requesting the data.

7. What kind of wiring is in cables that communicate in voltage changes that are received by the receiving device as ones and zeros?

* 1 point

Mark only one oval.

- ☐ Copper
- ☐ Gold
- ☐ Fiber
- ☐ Aluminum

8. What modulation type is used for computer networks? *

1 point

Mark only one oval.

- ☐ Line crimping
- ☐ RJ45
- ☐ Line coding
- ☐ Simplex communication

9. What is the difference between full duplex and half duplex? *

1 point

Mark only one oval.

- ☐ Full duplex is a form of simplex communications.
- ☐ Full duplex is slower than half duplex.
- ☐ Half duplex occurs when hubs are in use; full duplex occurs when switches are in use.
- ☐ Full duplex allows communications in two directions at the same time; half duplex means that only one side can communicate at a time.

10. The _____ consists of devices and means of transmitting bits across computer networks. * 1 point

Mark only one oval.

- ☐ modulation
- ☐ network layer
- ☐ physical layer
- ☐ data link layer

11. What is the most common type of cabling used for connecting computing devices? * 1 point

Mark only one oval.

- ☐ Twisted pair cable
- ☐ SATA cable
- ☐ VGA cable
- ☐ Power cable

12. Which of the following are category types of Twisted Pair Ethernet cable? * 2 points

Check all that apply.

- ☐ USB cable
- ☐ Unshielded twisted pair (UTP).
- ☐ Shielded twisted pair (STP).
- ☐ Foiled twisted pair (FTP).
