

Computer Networks - The Application Layer

Duration: 10 minutes.

* Indicates required question

1. Email *

2. Full name *

3. Student ID *

4. Unlike our five-layer model, the OSI network model adds two more layers on top of the Application Layer. * 2 points
Select examples of these new layers below.

Check all that apply.

- ☐ The session layer
- ☐ The interconnection layer
- ☐ The presentation layer
- ☐ The compression layer

5. An example of something that operates at the application layer is _____. * 2 points

Mark only one oval.

- ☐ TCP
- ☐ A web browser
- ☐ A router
- ☐ UDP

6. What's the standard number for a TTL field? *

2 points

Mark only one oval.

☐ 8

☐ 16

☐ 32

☐ 64

7. Which part of the operating system does the application use to communicate the need to establish a TCP connection? * 2 points

Mark only one oval.

☐ Networking stack

☐ ARP message

☐ The source port

☐ The router

8. Which section of the TCP/IP Five-Layer Network Model contains the data the application wants to send? * 2 points

Mark only one oval.

- ☐ The header of the Ethernet frame.
- ☐ The payload of the TCP segment.
- ☐ The payload section of the Ethernet frame.
- ☐ The payload section of the IP datagram.
