* Indicates required question

1. Email *

Minimum content for the slide deck:

1. Explain the concepts in Chapters 1 and 2 of the book with code examples.
2. Explain Ray's architecture and how it works end-to-end using a simple example that adds two objects, a and b, which could be scalars or matrices, and returns the result c.
3. Demonstrate Ray Serve using a code example.

2. Full name *

3. Student ID *

4. Your code (StudentID_FullName_Ray_Code.zip) *

Files submitted:

5. Your slide deck (StudentID_FullName_Ray.pptx) *
