

SC - GitHub Copilot 1

Duration: 10 minutes.

* Indicates required question

1. Email *

2. Full name *

3. Student ID *

4. Which GitHub Copilot feature provides real-time code suggestions as you type, helping to speed up the development process?

1 point

Mark only one oval.

- ☐ Natural language processing
- ☐ Code completion
- ☐ Chat and inline assistance
- ☐ Framework and language support

5. Before installing GitHub Copilot, it's crucial to:

1 point

Mark only one oval.

- ☐ Obtain a coding license.
- ☐ Ensure Visual Studio Code is installed.
- ☐ Upgrade your computer's hardware.

6. What is the first step in integrating GitHub Copilot into Visual Studio Code?

1 point

Mark only one oval.

- ☐ Customizing language preferences.
- ☐ Installing GitHub Copilot from the Marketplace.
- ☐ Writing your first line of code.

7. What does GitHub Copilot's Inline Chat feature primarily offer to developers?

1 point

Mark only one oval.

- ☐ Automated code generation without user input.
- ☐ Conversational assistance and code suggestions based on user queries.
- ☐ Email support for coding questions.
- ☐ Video tutorials on programming concepts.

8. How does GitHub Copilot enhance the coding workflow for developers through its basic code suggestion feature? 1 point

Mark only one oval.

- ☐ By introducing more complex coding paradigms that require advanced understanding.
- ☐ By automating the generation of routine code snippets, thereby accelerating development tasks.
- ☐ By eliminating the necessity for manual code review processes.
- ☐ By fostering a dependency on automated tools, reducing the need to understand underlying code logic.

9. Which of the following methods can be used to effectively generate basic code suggestions with GitHub Copilot, enhancing your coding process? (Select all that apply.) 1 point

Check all that apply.

- ☐ Typing out a comment in your code editor describing the functionality you need.
- ☐ Reviewing and editing auto-generated code snippets to better fit your project requirements.
- ☐ Submitting a detailed description of your coding problem in GitHub issues for community assistance.
- ☐ Engaging in an interactive session with GitHub Copilot, refining code suggestions based on feedback.

10. How can GitHub Copilot's Quick Chat and Chat features be effectively utilized in coding? (Select all that apply.) 1 point

Check all that apply.

- ☐ For generating code snippets based on simple prompts.
- ☐ To interactively ask questions and refine code suggestions.
- ☐ To understand code segments by requesting explanations.
- ☐ For exploring alternative coding approaches.

11. How is one-shot learning applied when crafting prompts for GitHub Copilot? 1 point

Mark only one oval.

- ☐ By providing multiple examples in the prompt.
- ☐ By asking Copilot to generate code in a specific programming language.
- ☐ By providing a single, clear example in the prompt.
- ☐ By giving a detailed description of the problem without examples.

12. When analyzing and modifying GitHub Copilot's suggestions, what should be your primary focus? 1 point

Mark only one oval.

- ☐ The length of the code.
- ☐ The aesthetic appeal of the code.
- ☐ The accuracy, relevance, and complexity of the suggestion to the prompt.
- ☐ The simplicity of the code.

13. Which of the following techniques are effective for crafting prompts that align with the 4S criteria (Specific, Simple, Surprising, and Significant) when guiding Copilot to generate solutions? (Select all that apply.) 1 point

Check all that apply.

- ☐ Using complex and technical jargon to ensure accuracy.
- ☐ Incorporating one-shot examples to provide context for the desired output.
- ☐ Keeping prompts concise and to the point.
- ☐ Designing prompts that pose a unique challenge or present an unexpected angle.
