

Software Engineering Capstone - Course Introduction

Duration: 10 minutes.

* Indicates required question

1. Email *

2. I want to get a full stack developer job. Should I take this course? *

1 point

Mark only one oval.

☐ Yes

☐ No

3. I can already develop both web and mobile applications. Should I take this course?

* 1 point

Mark only one oval.

☐ Yes

☐ No

4. Why attend the Software Engineering Capstone course? *

1 point

Check all that apply.

☐ To integrate the knowledge gained in order to solve real-world problems.

☐ To enhance the ability to independently acquire new knowledge.

☐ To experience solving real-world problems using software on your own.

5. What will I learn from this course? *

1 point

Check all that apply.

- ☐ Business Requirements, Business Use Cases, Domain Models, Product Backlog.
- ☐ Prototypes, Architecture, Solution Sketch, Proof of Concept.
- ☐ Kanban, Estimation, CI/CD/DevOps.
- ☐ Scrum.

6. If our capstone project is an enterprise system, then we shall learn ____ *

1 point

Mark only one oval.

- ☐ Coding Standards, User Interface Development, RESTful APIs, GraphQL APIs, gRPC APIs, Authentication, Access Control, Background Services, Domain-Driven Design, Scalability, High Availability, Distributed Storage, Distributed Cache, Distributed File System, Docker, Kubernetes, Unit Testing, Test Automation, Continuous Deployment, Continuous Delivery, Event Sourcing, and CQRS.
- ☐ TensorFlow, Keras, PyTorch, Hugging Face, Generative Adversarial Networks, Diffusion Models, Large Language Models, Machine Translation, Speech Recognition, Speech Synthesis, Text Summarization, Paraphrase Generation, Recommender Systems
- ☐ Unreal Engine, Unity.

7. If our capstone project is an intelligent system, then we shall learn ____ *

1 point

Mark only one oval.

- ☐ Coding Standards, User Interface Development, RESTful APIs, GraphQL APIs, gRPC APIs, Authentication, Access Control, Background Services, Domain-Driven Design, Scalability, High Availability, Distributed Storage, Distributed Cache, Distributed File System, Docker, Kubernetes, Unit Testing, Test Automation, Continuous Deployment, Continuous Delivery, Event Sourcing, and CQRS.
- ☐ TensorFlow, Keras, PyTorch, Hugging Face, Generative Adversarial Networks, Diffusion Models, Large Language Models, Machine Translation, Speech Recognition, Speech Synthesis, Text Summarization, Paraphrase Generation, Recommender Systems
- ☐ Unreal Engine, Unity.

8. How will I be evaluated? *

1 point

Mark only one oval.

- ☐ 1 mid-term written exam (20%) and 1 final written exam (80%)
- ☐ 1 individual test (10%), 2 team presentations (20%), 1 team project (40%), and 1 final individual oral exam (30%)
- ☐ Assignments (10%), mid-term individual project (30%), and final project (60%).

9. Can I get access to the lecture slide PDFs? *

1 point

Mark only one oval.

- ☐ No, you cannot. You have to attend lectures and take notes.
- ☐ Yes, you can get them from Moodle or Google Classroom. However, we recommend that you attend lectures and take notes to get core knowledge with specific examples that can help you reduce your reading time significantly.

10. Can I get access to the lecture recordings? *

1 point

Mark only one oval.

- ☐ No, you cannot. Lecture recordings will not be provided due to privacy and intellectual properties.
- ☐ Yes, you can get them from Moodle.

11. Do I have to attend lectures? *

1 point

Mark only one oval.

- ☐ Yes, you do. Otherwise you will fail the course.
- ☐ No, you do not. However you must attend lectures that contain grading activities in order to get individual quiz and team presentation scores. You can also get bonus points in lectures.
