Software Engineering Capstone - RESTful APIs

Duration: 10 minutes.

* Indicates required question

1. Email *

2. Full name *

3. Student ID *

4. RESTful API is ___ . * 1 point

Mark only one oval.

- stateless
- stateful
- stateless or stateful

5. RESTful API can work with ___ . * 1 point

Mark only one oval.

- JSON
- XML
- any text format

6. RESTful API runs on top of ___ * 2 points

Mark only one oval.

- Application layer.
- Transport layer.
- Network layer.

7. Which statements below are **true** about URL and URI? * 2 points

Mark only one oval.

- Every URL is a URI. A URI may not be URL.
- Every URI is a URL. A URL may not be URI.
- There is no difference between URL and URI. The terms differ just because of history.

8. What are the basic steps to implement RESTful APIs * 2 points

Check all that apply.

- [ ] Select a platform.
- [ ] Select a framework.
- [ ] Import HTTP/1.1 server and support libraries.
- [ ] Implement API functions.
- [ ] Implement routing for each URL (map URLs to API functions).
- [ ] Start local API server.
- [ ] Invoke local APIs.
- [ ] Deploy APIs to production server.
- [ ] Invoke production APIs.

9. When should RESTful APIs be used? * 1 point

Check all that apply.

- [ ] Performance is important.
- [ ] Ease of use is important.
- [ ] Error handling is important.

10. RESTful APIs **must** be implemented using HTTP 1.1 protocol? * 1 point
Hint: https://ics.uci.edu/~fielding/pubs/dissertation/rest_arch_style.htm

Mark only one oval.

- ◯ True
- ◯ False
