

SPM - Introduction to Software Estimation

Duration: 15 minutes.

* Indicates required question

1. Email *

2. Your student ID *

3. Your name *

4. Software development effort can be calculated in _____. *

2 points

Check all that apply.

- ☐ Points.
- ☐ Function points.
- ☐ Days, or months, or years.
- ☐ Man-days, or man-months, or man-years.
- ☐ Source lines of code.

5. Software size can be calculated in _____. *

2 points

Check all that apply.

- ☐ Dollars.
- ☐ Points.
- ☐ Function points.
- ☐ Days, or months, or years.
- ☐ Ideal days.
- ☐ Source lines of code.
- ☐ Object points.
- ☐ Use case points.

6. _____ is developed using historical cost information that relates some software metric to the project cost. * 1 point

Mark only one oval.

- ☐ Algorithmic cost modelling
- ☐ Expert judgement
- ☐ Estimation by analogy

7. The number of people required for a plan driven software project is determined _____ * 1 point

Mark only one oval.

- ☐ after an estimate of the development effort is made.
- ☐ by the project budget.
- ☐ from an assessment of the technical complexity of the system.
- ☐ by all of the above.

8. In software engineering, problem decomposition can be applied in which area? * 2 points

Check all that apply.

- ☐ The functionality that must be delivered.
- ☐ The process that will be used to deliver it.

9. Overestimating is _____ than underestimating. *

1 point

Mark only one oval.

☐ better

☐ worse

10. If a team often _____ software development effort using man-hour unit then switching to man-day unit * 1 point
may fix the issue.

Mark only one oval.

☐ overestimates

☐ underestimates
