

SPM - Software Configuration Management

Duration: 15 minutes.

* Indicates required question

1. Email *

2. Your student ID *

3. Your name *

4. Which of the following items can be baselines? *

1 point

Check all that apply.

- ☐ Software Contract.
- ☐ Software Requirements Specification.
- ☐ Software Design Specification.
- ☐ Source Code.
- ☐ Operational System.

5. The difference between release and milestone is that ____ *

1 point

Mark only one oval.

- ☐ A release contains only one configuration item while a milestone can contain several configuration items.
- ☐ Releases often have the same time frames while milestones may have different time frames.

6. A configuration management system can be implemented using only GitHub and a Git client. * 1 point

Mark only one oval.

- ☐ True
- ☐ False

7. Which activities should be performed to manage software configuration? * 2 points

Check all that apply.

- ☐ Identify configuration items.
- ☐ Develop directory structure.
- ☐ Identify baselines.
- ☐ Establish communication tools.
- ☐ Establish requirements management tools.
- ☐ Establish task tracking tools.
- ☐ Establish version control systems.
- ☐ Implement continuous integration.
- ☐ Implement continuous delivery.
- ☐ Implement continuous deployment.
- ☐ Implement DevOps.
- ☐ Establish bug tracking tools.
- ☐ Establish time tracking tools.
- ☐ Establish change control process and control changes.
- ☐ Perform status reporting.
- ☐ Perform configuration audits.
- ☐ Manage releases.
- ☐ Set up backup process.
- ☐ Perform archiving.

8. Which languages are often used for creating DevOps scripts? * 1 point

Check all that apply.

- ☐ Bash
- ☐ YAML
- ☐ PowerShell
- ☐ HCL

9. When should configuration status reporting be conducted? * 1 point

Check all that apply.

- ☐ Before starting any new development.
- ☐ Before making any significant changes to a configuration item.

10. When should configuration audit be conducted? *

1 point

Check all that apply.

- ☐ Before releasing any configuration item.
- ☐ Before archiving any configuration item.

11. Configuration control board is group of people being responsible for ____ *

1 point

Check all that apply.

- ☐ Identifying configuration items.
- ☐ Selecting and testing tools for implementing a configuration management system.
- ☐ Making decisions on baselines.
- ☐ Making decisions on change requests.

12. Why is configuration management important? *

1 point

Check all that apply.

- ☐ It helps us work safer.
- ☐ It helps us work faster.
- ☐ It helps us get more contracts.
- ☐ It helps us reduce development cost and time even for small projects.
