

Web Application Development - Advanced Hooks

Duration: 15 minutes.

* Indicates required question

1. Full Name *

2. Student ID *

3. Which of the following statements is true about the useReducer hook? *

1 point

Mark only one oval.

- ☐ The useReducer hook starts with an initial state only.
- ☐ The useReducer hook starts with a reducer function only.
- ☐ The useReducer hook starts with an initial state and reducer function.

4. The **reducer function** takes in the initial state and an action and returns the new state. *

1 point

Mark only one oval.

☐ True.

☐ False

5. The **useState hook** is best suited for complex state logic or when the next state depends on the previous one. * 1 point

Mark only one oval.

☐ True.

☐ False

6. You should call hooks inside loops. *

1 point

Mark only one oval.

☐ True.

☐ False.

7. You should call hooks inside if statements. *

1 point

Mark only one oval.

☐ True.

☐ False.

8. You should call hooks inside nested functions. *

1 point

Mark only one oval.

☐ True.

☐ False.

9. You have to always make multiple hook calls in the same sequence. *

1 point

Mark only one oval.

☐ True.

☐ False.

10. You are allowed to ____ . *

1 point

Mark only one oval.

- ☐ only call a single state hook inside a component.
- ☐ only call a single effect hook inside a component.
- ☐ call multiple state hooks and effect hooks inside a component.

11. You code a custom hook when you want to avoid duplication. *

1 point

Mark only one oval.

- ☐ True
- ☐ False

12. Building your own Hooks lets you extract component logic into reusable functions. *

1 point

Mark only one oval.

- ☐ True
- ☐ False

13. Let's imagine you code a custom hook, called for example useNext, on a separate file named useNext.js * 1 point

What's the minimum requirement for the custom useNext hook to be a valid hook?

Mark only one oval.

- ☐ The custom hook should always return a value.
- ☐ The custom hook should use at least one built-in React hook.
- ☐ The custom hook should always receive a parameter.
